hi all,

here is a possible setup for the Hotel Pleven
performance (changes are possible of
course):

the audio player is now a bit more hidden,
see the new interface from:
<http://1904.cc/aether/live/>

since we had some trouble (uncontrollable
delays) with the .ru servers, i propose to
drop them for now.

also, after some longer testing, it seems that
png has a tendency to be quite heavier than
jpg, specially with very colourful/contrasted
material. so, since the max patch has now a
contrast function, i suggest we switch back
to jpg (not for the pd users though).

this are now the corresponding FTP
directories:
